

Competency #3

Generate innovative projects relating to the professional environment in order to identify and meet the needs of others, while using tools, as well as ventures of quality and service.

While we were engaged in acquiring knowledge regarding business enterprises, our highest priority was to be engaged in the building up of the Kingdom of God. During our Business Administration Program, we visited various business enterprises. We also visited a local Seventh-day Adventist Church and participated in the Sabbath services. In endeavoring to assist the community, the leaders identified an area around the building, where water drainage from rainfalls is not adequate. The team embarked on a plan to donate drainage system or to give towards acquiring a piano to enhance worship services.
